

HOW TO GAIN BRC CERTIFICATION

ADDITIONAL SERVICES & TRAINING

We can conduct any of our training courses on-site at your location. We also offer training at public venues. [Click here to view the training course calendar.](#)

BRC

Following an introduction and history of the standard, attendees participate in a deep dive of each section of the BRC Standard. An overview of the BRC audit process is reviewed ensuring competence in audit protocol.

HACCP/PCQI

Our courses are recognized by the International HACCP Alliance and the Food Safety Preventive Controls Alliance (FSPCA).

Internal Food Safety Auditor Training

Internal audits are a requirement of all food safety certification schemes including, SQF, BRC and FSSC 22000. Become a qualified auditor and lead your team in properly conducting essential and dynamic self-assessments.

*Pre-Assessments

This is a great tool to verify the site's readiness for the audit. A pre-assessment can be thought of as a "practice audit." One of our BRC Auditors will come on-site and conduct an assessment to the actual BRC audit criteria. Non-conformances are identified, and the site uses this information to identify corrective actions prior to the actual audit.

*Gap Analysis

Similar to a pre-assessment, however a gap analysis includes consulting. Our BRC Consultants conduct an assessment to the standard, identify non-conformances, and identify practical solutions with implementation recommendations. A detailed report is received summarizing the findings, the guidance provided, and an action plan for implementation.

Personalized Service

Our team is accessible to answer questions or concerns from you and your team in a timely manner. Additional resources, such as whitepapers, webinars and guidance documents are available. Should any environmental monitoring, product identity, verification, validation, air, water or food packaging testing be needed, our network of ISO accredited laboratories are ready to assist you.

* All services with an asterisk are optional.
